## AEM Component Data Model

#### 2.2 Intended Audience

The primary audience of this design is:

- Content Authors
- Agencies
- Marketers

## **3** How to Enable/Turn-On the Component

This component should be available by default when the Evolution set up is enabled on a page. If it is still not available, then it can be enabled by going to the *Design mode* of the page and click *Configure* button on any prays and select from the list of available components (MetLife 2.0 based on the market) and click on  $\checkmark$  symbol to complete the selection.

## 4 Component Dialog

• Press edit to open the dialog and begin editing the component fields.

#### **Feature Overview**

#### Configuration

- 1. Gated Overlay Anchor ID Provide the Overlay's anchor ID.
- 2. **Container Aria Label** Provide a meaningful aria label for this component.
- 3. Close Aria Label This field is not required to be authored. This field will be removed in future.
- 4. Close Overlay Label This field is not required to be authored. This field will be removed in future.
- AEM Form Path The AEM form path should be configured to display overlay. As a pre-requisite to display overlay, a form must be created or an existing form can be used, and that path must be configured here.

#### Step 1: Creation of Form

An AEM adaptive form of any template based on the business need must be created. A sample form can be found here. (<u>https://qa1.author.metlife.com/editor.html/content/forms/af/test-gated-min-overlay.html</u>)This newly created form must be linked within Gated Overlay Component under '*AEM Form Path*'. The created form should have respective CSS configured.

i) '*minimizedTopPanel*' css to be configured on Title Panel
