Contents

2 Introduction

This document provides "How to Instructions" for the component "Recirc with Image". This component is intended to be used on all the Evolution pages.

2.1 Short Description

This component is used to path Users to Article Detail pages - package related articles, to engage the users to spend more time on the Website content. It includes Image, Headline, Article title, and Read time – entire Square including the Image, Title, and Headline is clickable and navigates User to the destination

Feature Overview

Image

All Photos on this component is Author provided, gradient treatment/darkening to be applied via AEM

Following rules are enforced:

- Recommended Desktop Image 405px width

Headline

Article Headline

Read Time

Read time for the Article

Following rules are enforced:
- Carousel functionality should snap next article into view port
- View port is the article that fully displays on the graphical background
    If less than 4 articles, remove carousel arrows
    This Module requires a minimum of 3 articles
    When more than 4 articles, keep carousel arrows active. Carousel should be an infinite loop
- Only activate click through on articles that are fully in view. When clicking on articles that are cut-off by the browser, snap that article into the view port

Interaction Alternative

Identify any low band width situation and handle the experience gracefully in IE - For low bandwidth scenarios: remove animation

Breakpoint Considerations

- Components stack vertically

2.2 AEM Component Data Model

| Tab	Field Name	Field Group	Field Type	Validation	Accepted values
Configuration	Configuration Type	Configuration	Drop Down	Mandatory	(Tags)/(Taxonomy)/ (Select Articles/Reports Manually)/(Enter Articles/Reports Manually)
	Header	Configuration	Text Field	Mandatory Max Char. 18	Alpha Numeric
